Our Mendocino County biodynamic wine industry is ruined due to glyphosate in the water table in a county that has banned GMO agriculture since 2004. Glyphosate is now found in the cord blood of newborns. This pernicious chemical has been forced down our throats by a chemical industry that seems to own our legislators who keep voting to protect biotech industry profits over the health and safety of the People. **USE THE PRECAUTIONARY PRINCIPLE** to protect the People. Until proven safe, don't use any! **NONE** is the correct safe limit of exposure for our children and for everyone else.
